

Meeting Note

@4 September 2026

☒ [Architecture improvement] Introduce the Custom Go Gateway

- From client side, they only see the API gateway service. Other services don't expose to the external network.
- Integrate `gatewaysvc` with `authenSvc`, `persistenceSvc`, `matchingSvc`, `parsingSvc`
- Design and deploy them on AWS

- Next task
- ☐ Upload source code to Ada Beat's github
- ☐ Transfer of work and documents
- ☐ Guideline for running and environment variables

@7 August 2026

☒ [Feature] Authorisation

Role Grants

- **Permission** = *What operation can be performed?*
- **Scope** = *On which resources can the operation be performed?*
- **Grant** = *A combination of Permission + Scope assigned to a Role.*

Role	Permission	Scope	Meaning
ADMIN	<code>resume:create</code>	<code>any</code>	Create any resume.
	<code>resume:delete</code>	<code>any</code>	Delete any resume.

Role	Permission	Scope	Meaning
	job:create	any	Create any job postings.
	job:delete	any	Delete any job postings.
RECRUITER	resume:view	any	View all consultants' resumes.
	job:create	any	Create new job postings.
	job:view	own	View only jobs created by the recruiter.
	job:update	own	Update only jobs created by the recruiter.
CONSULTANT	resume:view	own	View only their own resume.
	resume:update	own	Update only their own resume.
	resume:delete	own	Delete only their own resume.
	job:view	any	View all published job postings.

☒ [Feature] Google Captcha at Login page

reCAPTCHA v2 with the "I'm not a robot" checkbox.

The flow is:

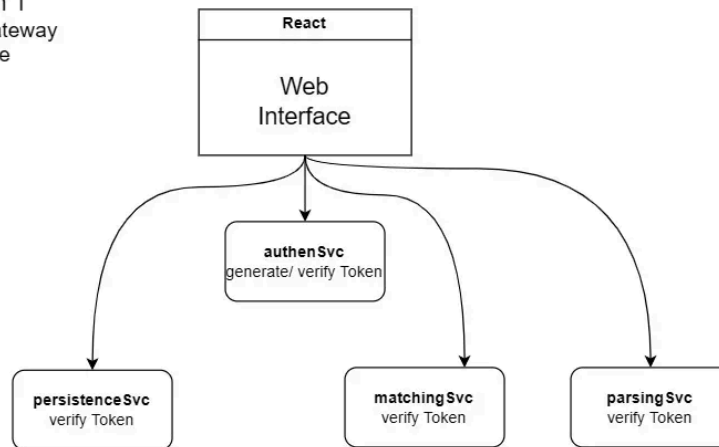

1. React (frontend) obtains a short-lived CAPTCHA token.
2. React sends that token with the login request.
3. The backend verifies it with Google.
4. Only then does the backend check the username and password.

Next task

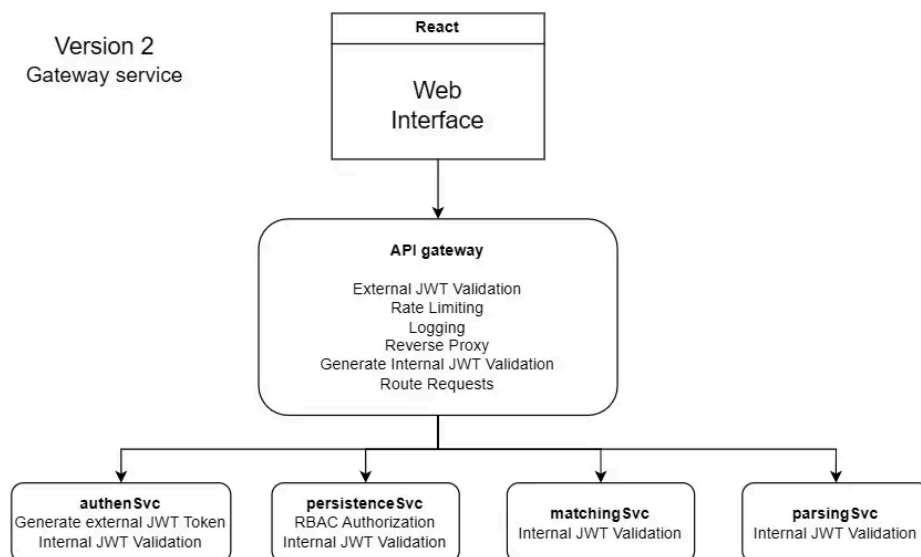

☐ [Architecture improvement] Introduce the Custom Go Gateway

- From client side, they only see the API gateway service. Other services don't expose to the external network.
- Have done 60%
- Integrate `gatewaysvc` with `authenSvc`, `matchingSvc`, `parsingSvc`
- Design and deploy them on AWS

Version 1
Without Gateway
service

Version 2
Gateway service

@23 July 2026

☐ Backend and Frontend APIs

☐ /login

☐ /signup. Restrict registration to `@adabeat.com` email addresses only.

☐ /reset-password?

token=0207e7a8ef8e63e07c8f2eddd66a942a78c4b67da654e80d9bb4c659302265467e

☐ Backend

☐ Create a new user in the database `usersdb`. `Email, password, createdAt, updatedAt`

☐ Encrypting Passwords. **bcrypt**

☐ Using Middleware to Protect Routes – Verify JWT token

☐ Implement the **Forgot Password / Reset Password** feature:

- ☐ Verify the user's `email` in the database.
- ☐ Generate a `resetToken` using `crypto.randomBytes(32)` and send an email containing a password reset link.
- ☐ Validate the `resetToken` and its expiration time (15 minutes) against the database.
- ☐ When the user submits a new password:
 - Hash the new password.
 - Remove the `resetToken` and `expiration` fields from the database.

☒ Upload code to Ada Beat github

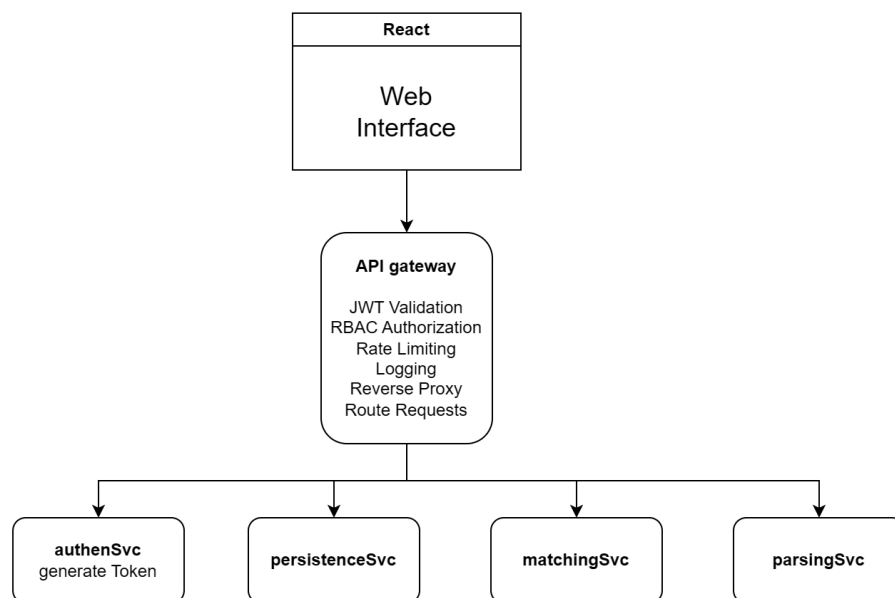

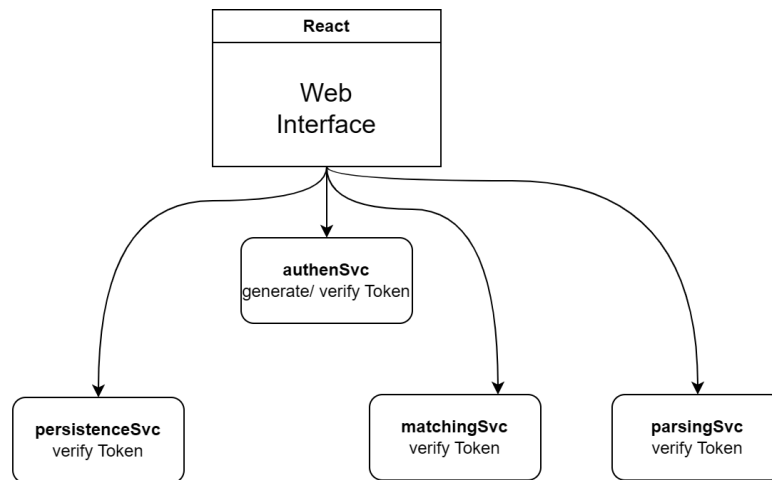

- Next tasks

☐ Google Captcha when Sign in

☐ Authorisation is implemented in all services

Role	Permissions
ADMIN	<code>resume:create</code> , <code>resume:delete</code> , <code>user:create</code> , <code>user:delete</code>
RECRUITER	<code>resume:view</code> , <code>job:create</code> <code>job:view:self</code> <code>job:update:self</code>
CONSULTANT	<code>resume:view:self</code> , <code>resume:update:self</code> <code>job:view</code>

☐ Think about the API gateway architecture – **Custom Go Gateway**

@2 July 2026

- ☐ [Feature] Process uploading files (.docx) → Gemini parses CV, jobs into input fields
 - ☒ ~~Deployment on AWS~~
 - ☒ ~~Show original file in the detailed information~~
- ☐ Backend
 - ☒ ~~[MatchingSvc] Restructure embedded phase in the backend code~~
 - ☒ ~~[MatchingSvc, PersistenceSvc] When Adding and Updating CV → call to matchingSvc to embed the experience field~~
- ☐ Frontend

☒ ~~[CVUploadFile] separate APIs and tsx files — Est. 2h~~

☒ ~~Deploy all changes on AWS~~

• Next tasks:

☐ [Feature] Authentication + Google captcha - 2 weeks

☐ Admin

☐ Users

☐ [Feature] Scraping information for jobs

☐ Frontend

☐ [Matching page] Edit reviews for wrapping text – Est. 1h

☐ [CVs page] Required field for Experience – Est. 30'

☐ Dashboard

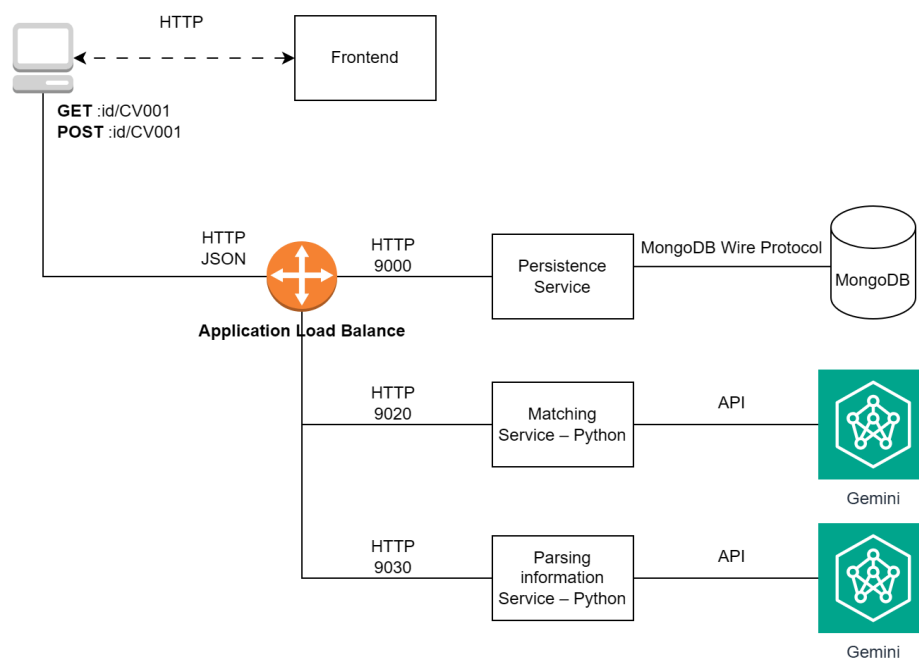

@25 June 2026

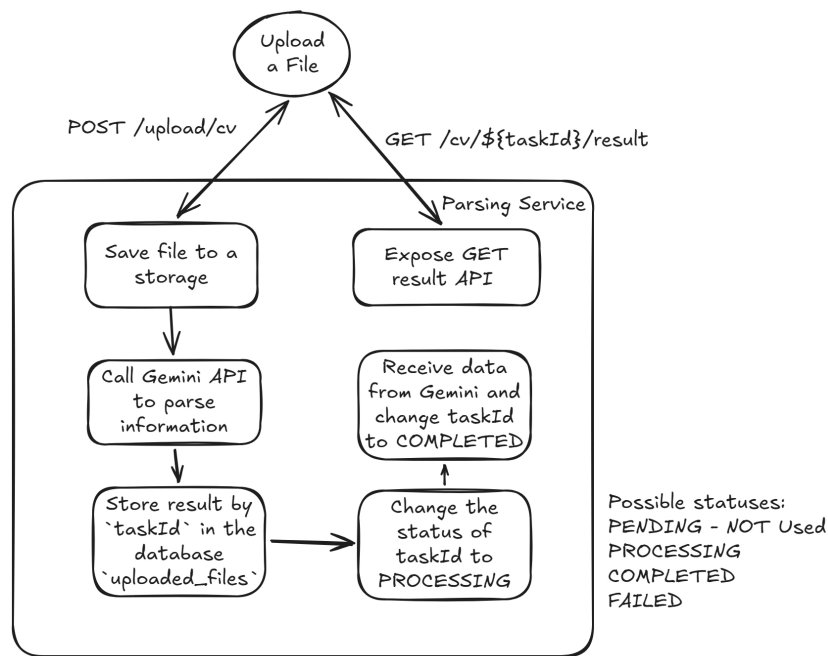

☐ [Feature] Process uploading files (.docx) → Gemini parses CV, jobs into input fields

☒ ~~Develop a new parsingSvc service~~

☐ Deployment on AWS

☐ Show original file in the detailed information

- Error
 - API Key

429 RESOURCE_EXHAUSTED. {'error': {'code': 429, 'message': 'Your project has exceeded its monthly spending cap. Please go to AI Studio at <https://ai.studio/spend> to manage your project spend cap. Learn more at <https://ai.google.dev/gemini-api/docs/billing#project-spend-caps>.

```
[DEBUG] main.py:70 - Processing: uploads/CV_Huy.docx
[DEBUG] parserWGemini.py:73 - Inserted document with _id: 6a39fc1cbded68d0bc03785c
[DEBUG] models.py:6268 - AFC is enabled with max remote calls: 10.
[DEBUG] _client.py:1025 - HTTP Request: POST https://generativelanguage.googleapis.com/v1beta/models/gemini-2.5-flash:generateContent "HTTP/1.1 429 Too Many Requests"
[DEBUG] main.py:81 - Errors occurred while processing uploads/CV_Huy.docx: ["Error parsing uploads/CV_Huy.docx: 429 RESOURCE_EXHAUSTED. {'error': {'code': 429, 'message': 'Your project has exceeded its monthly spending cap. Please go to AI Studio at https://ai.studio/spend to manage your project spend cap. Learn more at https://ai.google.dev/gemini-api/docs/billing#project-spend-caps. ', 'status': 'RESOURCE_EXHAUSTED'}}"]
```

- Next tasks:

- ☐ [Feature] Authentication + Google captcha
- ☐ [Feature] Scraping information for jobs
- ☒ Backend
 - ☒ [MatchingSvc] Restructure embedded phase in the backend code
 - ☒ Update CV, job
 - ☒ APIs to MongoDB and URL
- ☐ Frontend
 - ☒ Environment variables. ALB API 9000, and 9020

- ☐ [Matching page] Edit reviews for wrapping text
- ☐ In 'Matched details' → 'CV and Job matching' to add a button that shows all information on a candidate or a job (either a link to a new page or expanding the information)
- ☐ [CVs page] Required field for Experience
- ☐ Dashboard

@8 June 2026 @1 June 2026

- **Phase 4 — Real production system.** Already connected to frontend and backend services

```

S3 (frontend)
  ↓
ECS services
  ↓
Database (MongoDB.com) username and password

```

☒ ~~S3 website host. <http://s3-demo-web-497559249788-ap-southeast-1-an.s3-website-ap-southeast-1.amazonaws.com>~~

☒ ~~ECS Cluster is error in Singapore [ap-southeast-1](#) region ⇒ changed to N. Virginia [us-east-1](#)~~

☒ ~~Add **GET** health-check API to 2 services (matchingSvc (/) and persistenceSvc (/health))~~

- Security problems

- ☐ MongoDB Access List → Now, allow all addresses. How to allow from AWS ECS
 - ☐ **✗** peering connection. Free cluster is not allowed to use peering connection
 - ☐ Temporarily allow all IP address (0.0.0.0/0) access to MongoDB (in 1 week)
- ☒ ~~When Delete all services → recreate ALB → change API endpoints in frontend code~~
 - ☒ Environment variables
 - ☒ Frontend. ALB API 9000, and 9020
 - ☒ Backend. APIs to MongoDB and URL

- Next task

- ☒ ~~[Feature] See detailed information of a CV, job~~
- ☐ [Feature] Process uploading files (pdf) → Gemini parses CV, jobs into input fields
- ☐ [Feature] Authentication + Google captcha
- ☐ [Feature] Scraping information for jobs
- ☐ Backend

- ☐ [MatchingSvc] Restructure embedded phase in the backend code
 - ☐ Update
 - ☒ APIs to MongoDB and URL
- ☐ Frontend
 - ☒ Environment variables. ALB API 9000, and 9020
 - ☐ [Maching page] Edit reviews for wrapping text
 - ☐ In 'Matched details' → 'CV and Job matching' to add a button that shows all information on a candidate or a job (eiter a link to a new page or expanding the information)
 - ☐ [CVs page] Required field for Experience
 - ☐ Dashboard

@25 May 2026

Phase 3 — Backend microservices

- ☒ Build source code and deploy on ECS Fargate — Serverless

```

ECS Services
├── matchingSvc
└── persistenceSvc
  
```

Next task

Phase 4 — Real production system

```

S3 (frontend)
  ↓
ECS services
  ↓
Database (MongoDB)
  
```

- Problems
 - Create Fargate services → make sure that service can connect to **outside services (MongoDB)** and can connect to the frontend via internal network
- Quick checklist before deploy:
 1. Put `MONGO_URI` in Secrets Manager and set task `secrets`.
 2. Give task role permission to read that secret.
 3. Place task in subnet with network route to Mongo (VPC peering / private endpoint / NAT).

4. Open security group rules (Mongo inbound from Fargate SG).
5. Add startup retry script and container health check.
6. Configure CloudWatch logs for troubleshooting.

@18 May 2026

- Study and practice on AWS. **Phase 1 — Foundation (1–2 weeks)** focuses on these key areas

☒ ~~Basic services: IAM (Authentication), AWS CLI~~

☒ ~~Frontend (S3 + CloudFront)~~

☐ Elastic Container Service (ECS)

☐ API Gateway

Phase 2 — Frontend deployment

☒ ~~Build source code and deploy~~

Vite → S3

- Next tasks

Phase 3 — Backend microservices

☐ Build source code and deploy

```
API Gateway
  ↓
ECS Fargate
  ├── matchingSvc
  └── persistenceSvc
```

Phase 4 — Real production system

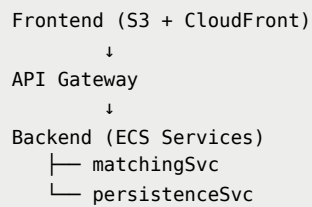

☐ Combine

```
CloudFront (frontend)
  ↓
API Gateway
  ↓
ECS services
  ↓
Database (RDS / DynamoDB)
```

@11 May 2026

Deployment

- A system design

- Study and practice on AWS. **Phase 1 — Foundation (1–2 weeks)** focuses on these key areas

☒ ~~Basic services: IAM (Authentication), AWS CLI~~

☐ Frontend (S3 + CloudFront)

☐ Elastic Container Service (ECS)

☐ API Gateway

- Next tasks

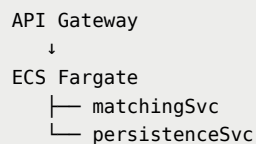

Phase 2 — Frontend deployment

☐ Build source code and deploy

Vite → S3 → CloudFront → Route53

Phase 3 — Backend microservices

☐ Build source code and deploy

Phase 4 — Real production system

☐ Combine

Development

- ☐ Backend
 - ☐ [MatchingSvc] Restructure embedded phase in backend code
- ☐ Frontend
 - ☐ [Maching page] Edit reviews for wrapping text
 - ☐ [CVs page] Required field for Experience
 - ☐ Dashboard
- ☐ [Feature] Process uploading files → Gemini parses CV, jobs into fields
- ☐ [Feature] Scraping information for jobs
- ☐ [Feature] Authentication + Google captcha

@4 May 2026

Matching page

- ☐ Backend
 - ☒ ~~(genAI) to generate reviews — Got some problems with Gemini API.~~
 - ☐ It returned `503 UNAVAILABLE. {'error': {'code': 503, 'message': 'This model is currently experiencing high demand. Spikes in demand are usually temporary. Please try again later.', 'status': 'UNAVAILABLE'}}}` → Upgrade to paid account
- ☐ Frontend
 - ☒ ~~Show reviews gotten from the matching service of backend~~
- Additional tasks
- ☐ Backend
 - ☒ ~~[Security] Change all API keys to environment variables and not leak them to Github~~
 - ☒ ~~[MatchingSvc] Restructure backend code — Remove some redundant code, change some function call~~
- Next tasks
- ☐ Deployment
 - ☐ AWS
- ☐ Backend

- ☐ [MatchingSvc] Restructure embedded phase in backend code
- ☐ Frontend
 - ☐ [Maching page] Edit reviews for wrapping text
 - ☐ [CVs page] Required field for Experience
- ☐ Process uploading files → Gemini parses CV, jobs into fields
- ☐ Scraping information for jobs
- ☐ Dashboard

Job Title ↑↓	Company ↑↓	Location	Match Score ↑↓	Matched	Missing	Actions
Senior React Developer	Innovation Labs	San Francisco, CA (Remote)	60%	5	1	Save Match
✓ Matched Requirements (5) 5+ years react experience typescript node.js aws graphql ✗ Missing Requirements (1) team leadership Reviews This candidate presents a strong alignment with your needs, particularly in their recent role as a Senior Developer where <u>the y led cloud-based application development using React. This directly matches your requirement for an experienced React developer to build the next generation of your product.</u> Their background further encompasses full-stack web application development, demonstrating a comprehensive skillset in constructing and maintaining enterprise systems. This profile suggests a highly capable individual with the hands-on experience to make immediate contributions to your team's goals.						

@20 April 2026

Next tasks - Additional tasks

- ☐ Process uploading files
- ☒ Backend—Security
 - ☒ Change all API keys to environment variables and don't push them to Github
 - ☒ Restructure backend code (Matching Service)

Matching page

- ☐ Backend
 - ☒ Rerun matching service by AI (Python code)
 - ☐ Coding a Matching service
 - ☒ to serve HTTP—
 - ☒ to generate embedding vector of experience of a consultant and descriptionn of an assignment
 - ☒ (compare phase) to Analyse match and give score (comparing embedding vector)
 - ☒ Provide API for frontend—GET /matching

☐ (genAI) to generate reviews – Got some problems with Gemini API. It returned 503 UNAVAILABLE. {'error': {'code': 503, 'message': 'This model is currently experiencing high demand. Spikes in demand are usually temporary. Please try again later.', 'status': 'UNAVAILABLE'}})

Rank	Similarity	Assignment ID	Title
=====			
1	0.6551	691a9166ac1cc780124fb6ad	Receptionist/Djurvårdare till Östhamm
Your profile presents a strong match for the Animal Caretaker/Receptionist position. Your experience as an informal pet care provider, administering diets and medication while ensuring client communication, directly aligns with the animal welfare and assistance aspects of this role. Coupled with your extensive background in high-volume customer service, managing daily operations, and handling payments, you possess the essential skills for providing a first-class customer experience at reception. This combination of direct animal care and robust client-facing operational experience demonstrates a highly relevant skillset for the District Veterinarians.			
2	0.6318	69144051310d15f25ceb604f	Communication Manager SEB Kort, Sol
(Could not generate explanation: 503 UNAVAILABLE. {'error': {'code': 503, 'message': 'This model is currently experiencing high demand. Spikes in demand are usually temporary. Please try again later.', 'status': 'UNAVAILABLE'}})			
3	0.6278	691441481f2899bbaf505d7f	Fullstack Engineer to Ramudden Global
(Could not generate explanation: 503 UNAVAILABLE. {'error': {'code': 503, 'message': 'This model is currently experiencing high demand. Spikes in demand are usually temporary. Please try again later.', 'status': 'UNAVAILABLE'}})			

☐ Frontend

☒ ~~Table for CV and Jobs (show scores and top 25 scores)~~

☒ ~~Matched Requirements & Missing Requirements~~

☒ ~~Get score, assignment_id, company, location, rank from the backend 2h~~

☐ Because the API is slowly processed (about 3 seconds) which affects User Experience → Solution?

☐ Show reviews gotten from the matching service of backend

☐ Show scores of top 25

☐ Pagination

@13 April 2026

☒ ~~Get, Add, Edit, Delete a job~~

☒ Backend

☒ ~~List/Get Jobs~~

☒ ~~Post a Job~~

☒ ~~Update a Job~~

☒ ~~Delete a Job~~

☒ Frontend

☒ ~~Context management and Data types (Typescript interface) for Job~~

☒ ~~API services call to backend~~

☒ ~~View/ Presentation on Job pages~~

- Next tasks

Matching page

☐ Backend

☒ ~~Rerun matching service by AI (Python code)~~

☐ Coding a Matching service

☒ ~~to serve HTTP. `/matching`~~

☒ ~~an asynchronous API GET `/matching`~~

☒ ~~to generate embedding vector of `experience` of a consultant and `descriptionn` of an assignment~~

☒ ~~to (compare phase) Analyse match and give score 2h~~

☐ ~~to (genAI) generate reviews~~

☒ ~~Analyse match and give score (comparing embedding vector)~~

☒ ~~Provide API for frontend~~

☐ Generate reviews from LLM (Large Language Model)

☐ Provide API for frontend

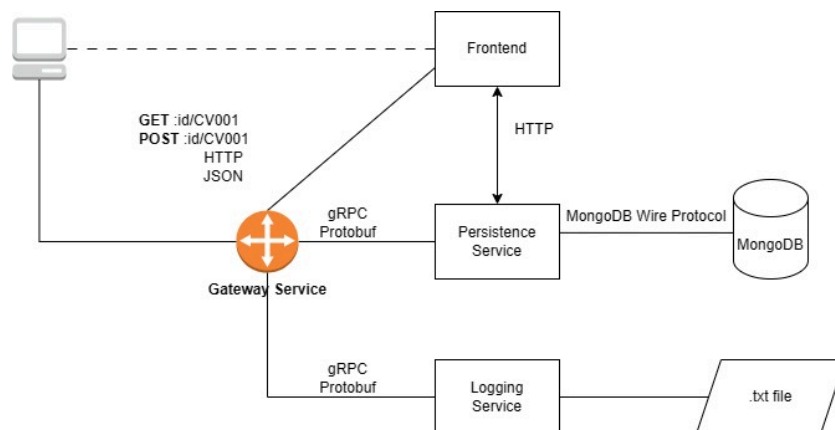

☐ Frontend

☒ ~~Table for CV and Jobs (show scores and top 25 scores)~~

- ☒ ~~Matched Requirements & Missing Requirements~~
- ☐ Get `score, assignment_id, company, location, rank` from the backend 2h
 - ☐ Because the API is slowly processed (about 3 seconds) which affects User Experience → Solution?
- ☐ Show reviews gotten from the matching service of backend

@7 April 2026 Meeting

- ☒ Refactoring frontend code. **DONE** on @2 April 2026
 - ☒ Pattern design: Flux
 - ☒ `useContext` to pass data through components
 - ☒ Using Interfaces in Typescript for data model
- ☒ Backend. **DONE**
 - ☒ Rerun Golang microservice
 - ☒ Connect to frontend (~~gateway → frontend → backend (persistenceSvc) → database~~)

- ☒ ~~Connect to the database~~
- ☐ APIs (PersistenceSvc) for frontend
 - ☒ HTTP connection
 - ☒ List/Get CV
 - ☒ Create/Post a CV
 - ☒ Update a CV
 - ☐ Delete a CV

Next tasks

- ☐ Get, Add, Edit, Delete a job
- ☐ Backend

- ☐ List Jobs
 - ☐ Get a Job
 - ☐ Post a Job
 - ☐ Update a Job
 - ☐ Delete a Job
 - ☐ Frontend
 - ☐ Context management and Data types (Typescript interface) for Job
 - ☐ API services call to backend
 - ☐ View/ Presentation on Job pages
-

@30 March 2026 Meeting

1. React Components:

- ~~Functional components (how to write and use them)~~
- ~~Props and state management~~

2. React Hooks:

- ~~useState~~
- ~~useEffect~~
- ~~useContext~~
- Custom hooks (if present)

3. React Context:

- ~~Creating context (createContext)~~
- ~~Providing context (Context.Provider)~~
- ~~Consuming context (useContext)~~

4. TypeScript with React:

- Defining and using interfaces and types for props and state
- Type annotations for functions and variables
- Generics in TypeScript (optional, but useful)

5. TypeScript Basics:

- Interfaces vs. types 1h-1h30'
- ~~Enums (if used)~~
- Type assertions and type inference

☒ ~~Get list of CVs from backend → a mess~~

☐ Add, Edit, and Delete a CV

☐ Backend

☐ Rerun Golang microservice

☐ Connect frontend to `gatewaySvc` (gateway → frontend → backend → database)

☐ Connect to the database

☐ Refactoring frontend code

☐ `useContext` to pass data through components

☐ Using Interfaces in Typescript for data model

☐ GET, ADD, Edit, Delete a job

☐ CV & Job Matching page

☐ Dashboard

@18 March 2026

☒ ~~Design concepts. <https://www.figma.com/make/uNo04S5eEbz9flkbPwVtOO/CV-and-Job-Matching-Interface?t=tzNjuzHQx9VUCYkD-0>~~

☐ Create a template – frontend code for the Web Interface

☐ 4 main pages

☐ CVs including 3 pages: Add, Edit, Show

☐ Jobs including 3 pages: Add, Edit, Show

☐ Matching

☐ Dashboard

☐ Filters & Search

☐ Style, color, button

☐ Form and submitting

☐ Integrate with backend's work

☐ GET a CV

☐ List CVs

☐ Post a CV
